

## CSR Policy Statement

It is Wordsworth Excavations' is whole-heartedly committed to fully discharging its Corporate Social Responsibility (CSR) and is dedicated to providing customers with the highest possible quality of service while managing the social, environmental and economic impact of its business activities and defines this as:

### Sustainability

Wordsworth Excavations Ltd believes in the importance of buildings that add value to their surroundings and limit the negative impact on the environment. To develop and improve our approach to sustainability, we have implemented the One Planet Living Framework. One Planet Living has been incorporated into our business policies, objectives and processes to promote understanding and consistency in our approach to delivery sustainable solutions. The One Planet Living framework sets out 10 guiding principles which address key areas of sustainability to ensure we operate our business within our fair share of the earth's resources. The 10 principles are:

- Reduce Carbon
- Reduce Waste
- Sustainable Transport
- Local and Sustainable Materials
- Local and Sustainable Food
- Sustainable Water
- Natural Habitats and Wildlife
- Culture and Heritage
- Equity and Fairtrade
- Health and Happiness
- 

### Waste Management

Through design and the careful selection of materials, building systems and construction techniques, the Company aims to minimise the volume of its waste stream, to recycle and reuse materials wherever possible and minimise disposal to landfill. The Company's sites have a waste management plan that covers the reduction, reuse, recycling and disposal of waste, in accordance with the Site Waste Management Plan Regulations 2008. This process is carried out in partnership with the supply chains that all those involved with the business can contribute to reducing construction wastes.

### Community

Our aim is to positively influence the communities in which we work, and we endeavour to carry out a programme of community enhancement where we are constructing buildings. This may include becoming involved in, or supporting, local community events, volunteering on community projects in the local area or simply providing advice on our developments to local members of the community. We will support the local economy where possible, contributing to the 'local pound' by employing and training locally based staff and supply chain members, and procuring our materials locally.

### Operating Safely

Creating and maintaining safe sites is critical to the Company's operational effectiveness and reputation. Wordsworth Excavations Ltd has well-developed health and safety policies and procedures and these are integral to the way the entire organisation operates.
